EUTECTIC CAST IRON BOILERS
COMMERCIAL AND INSTITUTIONAL

GT 330 A

- 88%+ Efficiency
- Near Condensing Eutectic Cast Iron - Water Temperature Supply @ 86°F
- Operates under large Temperature Differentials - Up to 81°F without Thermal Shock
- Low NOx Compatibility
- Maximum Working Pressure 90 p.s.i.

GT 330 A
High Performance Low-Temperature Return Eutectic Cast Iron Boilers

Low Return Water Capability
Maximizes Energy Savings

The GT 330 A Series is a eutectic cast iron 3-pass, high efficiency, large net output, low operating temperature, designed boiler. These boilers are specifically designed for oil / gas / propane firing.

The GT 330 A is equipped with a simplified control panel with built-in on/off limit, high limit, manual reset limit and temperature gauge.

The GT 330 A is a Three Pass Design with large combustion chamber and horizontal flue passes with fins. The heat transfer is enhanced by the fins and eutectic cast iron baffles. This body design assures:

- Efficiency up to 88%
- Low pressure drops
- Low noise level
- High thermal efficiency and heat transfer

Low Water Outlet Temperature down to 85°F with indoor/outdoor reset achieves significant energy savings by reducing stand-by fuel consumption. In addition, it’s not necessary to maintain boiler temperature between the two heating cycles, which further reduces fuel consumption and achieves excellent overall efficiency. Studies show substantial savings over retrofit boilers and over new competitive models.

Easy Cleaning with Hinged Door for burner and flue access. Doors can be hinged right or left based on your access needs. Boiler is easily cleaned and vacuumed, resulting in lower maintenance costs.

Eutectic Cast Iron boiler body provides exceptional resistance to temperature variations and thermal stress. De Dietrich’s eutectic cast iron is 30% more flexible than any competitive cast iron allowing safe low temperature operation.

Four Inch Insulation featuring reinforced fiberglass wool. De Dietrich Boilers feature double insulation of the boiler front which minimizes heat loss and allows reduced stand-by consumption and improved thermal efficiency.

Control Panel. The standard control panel supplied is designed for heating only. The panel is equipped with a boiler thermometer, on/off limit, high limit and manual reset limit. The large size permits it to be integrated easily with third party energy management systems.

Standard Equipment

- Eutectic Cast Iron Nipples
- Built-in High Limit with Manual Reset
- Thermocord Combustion Sealed
- On/Off Limit
- Temperature Indicator
- ASME Relief Valve
- Low Water Cut-Off
- Low NOx Burners (optional)
- Factory Assembly (optional)

Contact your local De Dietrich representative for a list of available burners.

GT 330 A

High Performance Low-Temperature Return Eutectic Cast Iron Boilers

- Control panel designed to enable easy wiring connections
- Eutectic cast iron boiler body, thermal shock and corrosion resistant, allowing low modulated temperature operation and complete stop between heating periods
- Large wiring duct leading to the control panel
- Large flue-ways with fins and turbulators offering high efficiency and easy maintenance
- Boiler body with 3-pass flueways
- Completely insulated boiler body with four inch thick fiberglass wool
- Design of the front section is adapted for the use of low NOx burners

De Dietrich

As the Boiler Should Be!!!

Setting the Benchmark for Low-Temperature Near-Condensing Eutectic Cast Iron Boilers

MEA 304-06-M (City of New York)
Notes:
- Approved for direct-vent applications - use only approved venting components as listed
- Natural draft applications, approved for Type L vent [Gas-Oil] or Type B Vent [Gas only]
- All model comply with latest Canadian & USA standards
- Outputs are rounded off. 85.2% efficiency is the published efficiency (oil is +3%)
